

# DAMIÁN BRIONES

Quito, EC | work@damianbriones.dev | +593 987621334  
www.damianbriones.dev | www.linkedin.com/in/damian-briones-flachier

## SUMMARY

Software Engineer specializing in backend development. Proficient in multiple languages, with primary expertise in C# and SQL. Experienced in maintaining and improving large-scale web and desktop applications used by thousands daily. I am skilled in building new projects from scratch, maintaining legacy codebases, migrating systems to modern technologies, and implementing new software architectures to improve scalability and maintainability.

## SKILLS

- |                       |   |
|-----------------------|---|
| • Frontend:           | Blazor, NextJS, SvelteKit, Tailwind                 |
| • Backend:            | .NET Core, .NET Framework, SQL, APIs, Azure, Docker |
| • Project Management: | Azure DevOps, Jira, MS Project, Git                 |
| • Languages           | English (Advanced), Spanish (Native)                |

## EXPERIENCE

**LogiztikAllianceGroup** Quito, Ecuador | Sep. 2023 – Current  
**Backend Software Developer** Remote

- Maintained existing software used by hundreds of people daily around the globe using .NET, SQL and NextJS.
- Migrated services from .NET Framework to latest versions of .NET Core.
- Implemented new services using microservices as an architecture.
- Optimized services and SQL Queries from minutes to milliseconds.
- I quickly became team leader for many different projects.

**CloudStudio** Quito, Ecuador | Aug. 2019 – Jul. 2023  
**Software Developer** Remote

- Maintained existing banking software implemented in more than ten institutions inside Ecuador using .NET and Silverlight
- Migrated services from .NET Framework to latest versions of .NET.
- Generated and optimized reports used by users of the applications.

## EDUCATION

**Universidad de las Americas (UDLA)** Quito, Ecuador | 2019 – 2024  
**Bachelor in Software Engineering**

- |  |                                  |
|--|----------------------------------|
| • Advanced programming                     | • Game development               |
| • Advanced software engineering principles | • Software design                |
| • Web, mobile, and desktop development     | • Networks and Operative Systems |
